

Green Power Program 50% Savings

Helping the environment with the new Green Power Rate

Since 1998, San Isabel Electric Association has offered you the opportunity to support the continued development of renewable energy resources through the *Green Power Program*. For a minimal additional monthly charge, you can purchase green power to supply a portion of the electricity you use.

Through our partnership with Tri-State Generation and Transmission, we're harnessing the wind and developing other renewable technologies to deliver green power to you—adding to the existing mix of reliable and affordable electricity produced at hydropower and coal-based facilities.

Buy now at the reduced rate of just 1.25 cents per kwh!!!

Guidelines for Green Power Rates

Available—to all San Isabel Members in 100 kwh per month blocks.

Eligible—any San Isabel consumer who completes and returns to San Isabel an *"Intent to Purchase Renewable Generated Power Application."* This form will indicate the number of 100 kwh blocks the member intends to purchase monthly, as a firm purchase commitment for three (3) years.

Rate—The rate will be a renewable power premium (added charge) for all renewable power delivered to the member participant as committed in the *"Intent to Purchase Renewable Generated Power Application."* The renewable rate is 1.25 cents per kwh, per month, purchased in 100 kwh per month blocks (\$1.25 per 100 kwh block, per month.) This is in addition to the present rate applicable to the member. This charge is also subject to "adjustments." (see "adjustment" definition below.)

Duration—This rate is now available.

Adjustments—In the event the power supplier, Tri-State Generation and Transmission charges San Isabel Electric for additional costs due to the character or conditions of service, such charge or charges shall be passed on to the purchasing member in the same exact amount.

San Isabel Electric Association, Inc.
Application G1
Renewable Resource Power Service Intent to Purchase Application

In accordance with San Isabel Tariff G1 for Renewable Resource Power Service, the member below is agreeing to purchase renewable resource generated power. It is understood by the member that this is a firm purchase power commitment for a period of three (3) years for a renewable power premium as stated in the San Isabel rate tariff provisions.
